PROFESSIONAL SUMMARY

Senior QA Engineer and Quality Engineer with 17+ years in technology, 10 of them dedicated to software quality, and ISTQB CTFL certified. Hands-on and strategic experience in risk-based testing, web and mobile automation, APIs, performance, security, accessibility, CI/CD, observability and AI applied to testing. Background in financial products, SaaS and consulting, working with Product and Engineering to widen coverage, prevent failures and increase confidence in every release.

CORE SKILLS

- **Strategy and technical leadership:** test strategy, risk-based testing, Quality by Design, shift-left, acceptance criteria, risk-driven coverage, metrics, quality gates, mentoring and continuous improvement.
- **Automation and services:** Playwright, Cypress, Selenium, Appium, Cucumber/BDD, Jest, JUnit, Postman, SoapUI, REST, OpenAPI, contract testing, mocks, stubs, web, mobile, E2E and microservices.
- **Performance, security and reliability:** JMeter, k6, OWASP/ASVS, SAST, DAST, SCA, resilience, SLI, SLO, SLA, DORA metrics, observability, logs, metrics and traces.
- **Continuous delivery and cloud:** Jenkins, GitHub Actions, GitLab CI/CD, Azure DevOps, Azure Pipelines, Docker, YAML, Microsoft Bicep, Pipeline as Code and Blue-Green, Canary and Rolling Update strategies.

PROFESSIONAL EXPERIENCE

SPASSU - Caixa Econômica Federal project | Senior QA Engineer · Senior Quality Automation Engineer

07/2025 - 07/2026 | Porto Alegre, Brazil

Owned test strategy and execution for digital financial products, connecting technical risks, metrics and business needs.

- Built coverage across functional, integration, regression, security, performance and load testing.
- Used automation, simulators, mocks and stubs to validate journeys, integrations and critical scenarios.
- Applied OWASP practices and consolidated evidence and recommendations for Product and Technology.

QualityMap | Senior Software Quality Engineer · Team Leader · Prompt Engineer for Testing

10/2024 - 05/2025

Consulting work on quality processes, risk, metrics, audits and continuous improvement.

- Mapped bottlenecks and supported corrective actions with clients, technical teams and business areas.
- Ran AI experiments at QualityLAB to support efficiency and quality decisions.

HostGator Latin America | Senior Software Quality Assurance Engineer

04/2024 - 08/2024 | Santa Catarina, Brazil

Owned strategy, planning and execution of REST API, contract, performance, security and exploratory testing.

- Helped cut production bugs by 20% by strengthening automation and API testing.
- Created test plans, documentation and per-sprint metrics, and supported code reviews.

Itaú Unibanco | Senior Quality Analyst

05/2021 - 08/2023 | São Paulo, Brazil

Defined quality strategies for financial and payment products, combining manual and functional testing with web and mobile automation.

- Automated journeys with Selenium, JUnit, Cucumber/BDD, Percy and Appium, and ran performance tests with JMeter.
- Worked with Engineering and Product from refinement through validation, release and quality monitoring.

Thoughtworks | Quality Analyst Consultant
04/2020 - 05/2021 | Clients: Lenovo and PwC North America

Quality Engineering consulting for international clients, with risk-based strategy, exploratory testing and API, web and mobile automation.

- Created and maintained tests with Postman, Insomnia, Jest and JavaScript.
- Facilitated discussions and contributed to improvements in chapters and communities of practice.

KingHost | Quality Analyst
09/2019 - 04/2020 | Porto Alegre, Brazil

Built the company's first QA practice across web systems, APIs, integrations, automation and CI/CD pipelines.

- Helped cut production bugs by 90%.
- Automated an onboarding process, reducing it from about three days to roughly one minute.
- Developed a PowerShell API integrated with Microsoft Exchange Server and worked with PHP and Perl.

TAG - Experiências Literárias | Full Stack Development Intern
04/2019 - 09/2019 | Porto Alegre, Brazil

Took part in building a CRM with React, Node.js and PostgreSQL, including UI automation with Cypress.

DBServer | Quality Analyst · Banrisul and PROCERGS projects
11/2016 - 01/2019 | Porto Alegre, Brazil

Functional, API and integration testing and agile practices on financial-sector projects for Banrisul and public-sector projects for PROCERGS, after moving from test infrastructure into QA.

- Ran performance tests with JMeter, service validations with SoapUI and initiatives to evolve test automation.

EARLIER EXPERIENCE IN TECHNOLOGY

Performática Computação Ltda. | IT Support Analyst | 11/2009 - 11/2016 | Technical and advisory support for the Compulab software, networks, Windows, user training and remote support.

TOTVS | IT Support Specialist | 06/2009 - 10/2009 | Support for the Personal Med system, networks, Windows, solution operations and technology projects.

SELECTED TECHNICAL PROJECTS

- **AIMA 2.0:** applied research connecting Quality Engineering, metrics, AI and strategy to turn evidence and risk into decisions. aima20.dev
- **API Quality Engineering Lab:** functional tests, OpenAPI contracts, security, accessibility, k6 performance and continuous integration.
- **Expense Approval Quality Lab:** Playwright and TypeScript for risk-driven E2E and API tests covering roles, authorization and state transitions.
- **Quality Change Intelligence Lab:** deterministic Go tool to prioritize checks, risk coverage and residual risk.
